Slovenian Business Delegation to ReBuild Ukraine 2026

ABOUT THE DELEGATION

SPIRIT, Slovenian Public Agency for Investments, Entrepreneurship and Internationalization, in cooperation with the Ministry of the Economy, Labour and Sport, the Ministry of Foreign and European Affairs and the Centre for European Perspective, is organising a business delegation of Slovenian companies to ReBuild Ukraine 2026 in Warsaw from 11 to 14 November 2026. The delegation is led by Tine Novak, Acting Director-General of the Directorate for Industry, Entrepreneurship and Internationalisation at the Ministry of the Economy, Labour and Sport.

The delegation brings together nine Slovenian companies from construction, energy, water and municipal infrastructure, engineering, equipment manufacturing, telecommunications and professional services. It gives them direct contact with Ukrainian project owners, communities, international financial institutions and potential business partners.

PROGRAMME

Wednesday, 11 November
- Arrival of the delegation in Warsaw.

Thursday, 12 November
- 10:00–11:00 Official opening of the exhibition and conference,
- 11:30–12:45 Workshop: Procurement Opportunities under the Ukraine Energy Support Fund,
- 12:30–16:10 Recovery Construction Forum and Energy in Action conference,
- 13:00–15:00 Meetings with Ukrainian municipalities, visit to the Ukrainian national pavilion,
- 18:00–19:30 Delegation working dinner.

Friday, 13 November
- 8:00–10:30 Investing in Ukraine through PPPs,
- From 10:00 Exhibition visits and individual B2B meetings,
- 10:15–16:00 Communities Marathon, Water Recovery Forum and Solar & BESS Grid Forum,
- Until 16:00 Meetings with Ukrainian communities, companies and international financial institutions; closing and networking.

Saturday, 14 November
- Departure of the delegation.

The programme is indicative and may still change.

REPUBLIC OF SLOVENIA
MINISTRY OF THE ECONOMY, LABOUR AND SPORT

ABOUT THE MINISTRY

The Ministry of the Economy, Labour and Sport works to create a stable and competitive environment for the Slovenian economy, to create quality jobs and to strengthen Slovenia's international competitiveness. It supports companies at home and abroad and promotes entrepreneurship, innovation and internationalisation.

Its areas of work include industry, entrepreneurship and internationalisation, tourism, the internal market, the wood industry, sport, and labour and employment. Implementing agencies, including SPIRIT Slovenia, support the implementation of development measures and the promotion of the Slovenian economy.

INDUSTRY, ENTREPRENEURSHIP AND INTERNATIONALISATION DIRECTORATE

The Directorate aims to increase the competitiveness and productivity of Slovenian companies. It supports entrepreneurship and access to finance, the social economy and the transition to green, circular and digital business models. It shapes policies that help Slovenian companies enter foreign markets and attract foreign investment, including financial incentives under the Investment Promotion Act.

The Directorate works with implementing institutions such as SPIRIT Slovenia, the Slovene Enterprise Fund and the Public Scholarship, Development, Disability and Maintenance Fund.

SUPPORT FOR UKRAINE'S RECOVERY

Together with the Ministry of Foreign and European Affairs, SPIRIT Slovenia and the Centre for European Perspective, the Ministry supports the participation of Slovenian companies in Ukraine's recovery and reconstruction. The business delegation to ReBuild Ukraine 2026 is led by Tine Novak, Acting Director-General of the Directorate.

Ministry of Foreign and European Affairs

ABOUT THE MINISTRY

The Ministry of Foreign and European Affairs of the Republic of Slovenia shapes and implements Slovenia's foreign policy and its policy in the European Union. Through its Directorate for Economic Diplomacy, Development and Humanitarian Aid, it supports the internationalisation of the Slovenian economy and coordinates Slovenia's official development cooperation and humanitarian aid.

SUPPORT FOR UKRAINE'S RECOVERY

Slovenia and Ukraine have concluded an agreement on development cooperation, under which programmes and projects are identified jointly by the national coordinators of both countries – on the Slovenian side, the Ministry of Foreign and European Affairs. Projects are planned and implemented in line with Ukraine's national priorities and development needs.

Slovenia's approach links humanitarian aid, recovery and development to strengthen Ukraine's resilience. The Ministry also finances the Recovery and Reconstruction in Ukraine programme, implemented by the Centre for European Perspective, which connects Ukrainian communities with Slovenian municipalities, institutions and companies.

ECONOMIC DIPLOMACY

Together with the Ministry of the Economy, Labour and Sport, SPIRIT Slovenia and Slovenian embassies, including the Embassy of the Republic of Slovenia in Kyiv, the Ministry helps Slovenian companies identify business opportunities and partners in Ukraine's recovery and reconstruction.

SLOVENIA BUSINESS | SPIRIT Slovenia Business Development Agency

ABOUT THE AGENCY

SPIRIT, Slovenian Public Agency for Investments, Entrepreneurship and Internationalization (SPIRIT Slovenia) is the national agency for the promotion of entrepreneurship, internationalisation, foreign direct investment and technology. It is the first point of contact for potential investors and international companies looking for business opportunities in Slovenia, and a one-stop shop for Slovenian exporters, helping to simplify procedures and reduce the costs and risks of entering new markets.

SERVICES FOR FOREIGN COMPANIES AND INVESTORS

- Information and business support, free of charge and tailored to each company,
- Data on industries, legislation, taxes, incentives, industrial sites and local suppliers,
- Links with Slovenian companies, industry associations, state and local authorities,
- Fact-finding missions, business and investment conferences and trade shows,
- Support for existing foreign investors in Slovenia, with full confidentiality.

SERVICES FOR SLOVENIAN EXPORTERS

- Information, presentations and business consulting for international markets,
- Business delegations, B2B meetings and joint national pavilions at international fairs,
- Tailor-made mentoring and training programmes for international business.

SUPPORT FOR UKRAINE'S RECOVERY

Together with the Ministry of the Economy, Labour and Sport, the Ministry of Foreign and European Affairs and the Centre for European Perspective, SPIRIT Slovenia organises business delegations and B2B meetings that connect Slovenian companies with partners involved in Ukraine's recovery and reconstruction. This catalogue and the business delegation to Warsaw are part of these activities, carried out within SPOT Global+, co-financed by the European Union.

CENTER ZA EVROPSKO PRIHODNOST
CENTRE FOR EUROPEAN PERSPECTIVE
CEP

ABOUT THE INSTITUTION

CEP is a government institution and an official provider of Slovenian Official Development Assistance. Since 2006, CEP has implemented more than 160 international projects in regions of strategic significance for Slovenia.

Since 2023, CEP has been implementing the programme “Recovery and Reconstruction in Ukraine”, focusing on post-war recovery, reconstruction, local and regional development, modernisation and EU integration, and on establishing cross-border long-term partnerships between public and private actors from Slovenia and Ukraine. The programme’s economy pillar focuses on local and regional economic development and the internationalisation of the business sector as a cornerstone of Ukrainian recovery and reconstruction. Activities are focused on areas where Slovenian knowledge, innovative solutions and experience offer the greatest thematic advantage and added value.

ACTIVITIES RELEVANT FOR UKRAINE

CEP works with Ukrainian communities, districts and regions on topics prioritised by their development plans, such as environment, energy, building for the future, digitalisation, rehabilitation, water and waste management, civil protection and disaster response. CEP:

- establishes cross-border partnerships focused on priority topics of Ukraine’s recovery, development and modernisation,
- strengthens the capacities of Ukrainian authorities at all levels and provides investment and other project proposals,
- gathers consortia of Slovenian companies around development gaps recognised in Ukraine,
- develops proposals for possible Slovenian flagship projects for obtaining external (EU) funding.

DRT Agro

Efficiency needs knowledge

SHORT DESCRIPTION OF THE COMPANY

DRT Agro d.o.o. is a Slovenian company specialising in integrated solutions for water management, water supply infrastructure and agricultural irrigation.

The company provides engineering, design, development and turnkey implementation of water infrastructure projects, including agricultural irrigation systems. Its product portfolio includes pumping equipment, pipelines and fittings, water filtration systems, valves, water distribution and control systems, as well as diesel generators.

DRT Agro's core competencies include hydraulic engineering, technical planning, system integration and the development of customised solutions adapted to specific project requirements. The company operates across EU markets, primarily in Slovenia and Hungary, and has practical experience in implementing water infrastructure projects, including hydrant distribution networks, pumping stations and irrigation systems.

PRODUCTS AND SERVICES RELEVANT FOR UKRAINE

DRT Agro provides engineering, design, equipment supply and project implementation for water infrastructure and agricultural irrigation systems. Its solutions include pumping stations, pipeline and hydrant networks, water filtration, distribution and control systems, as well as diesel generators for independent power supply.

These solutions are applicable to the reconstruction and modernisation of municipal and rural water supply networks, pumping stations and agricultural irrigation infrastructure. By combining engineering and equipment supply within a single project, DRT Agro ensures that pumping, filtration, distribution and control systems are technically compatible and configured to project requirements.

COOPERATION INTERESTS

- Consortium partnerships for infrastructure reconstruction projects.

SHORT DESCRIPTION OF THE COMPANY

For more than seven decades, ETI has been developing and manufacturing solutions for the protection and control of electrical power, helping ensure the reliable operation of energy, industrial and residential systems.

Founded in 1950, ETI ranks among the world's five largest fuse manufacturers and is a leading manufacturer of switchgear and protective devices. With a product portfolio covering current ratings from 0.5 A to 6,300 A, ETI provides comprehensive solutions for residential, commercial and industrial buildings, power distribution networks and renewable energy systems, including photovoltaic installations.

Over the years, ETI has built a network of subsidiaries across Europe and has maintained a local presence in Ukraine through its subsidiary for more than 20 years.

PRODUCTS AND SERVICES RELEVANT FOR UKRAINE

Electrical protection and control equipment for residential and industrial installations and power distribution systems:

- circuit breakers and switches with current ratings from 0.5 A to 6,300 A,
- residual current circuit breakers (RCCBs) and RCBOs, motor protection and load-limiting circuit breakers,
- monitoring and control devices, and surge protective devices (SPDs),
- modular, miniature, motor, capacitor-switching and auxiliary contactors, and overload relays,
- low-voltage fuse-links (D, D0, cylindrical and NH knife-blade), high-voltage fuse-links and special-purpose fuse-links for DC systems and semiconductor protection,
- protective devices for renewable energy installations,
- residential and industrial distribution boards, industrial plugs and sockets, and terminal blocks.

COOPERATION INTERESTS

- Distributors, local partners, investors, engineering companies and project developers.

SHORT DESCRIPTION OF THE COMPANY

GPO d.o.o. (Construction, Engineering and Project Management) is a Slovenian company with more than a decade of expertise in civil engineering, specialising in railway infrastructure, signalling and safety systems, telecommunications equipment, optical network development, road infrastructure and sewage systems. Based in Brezovica near Ljubljana, the company delivers comprehensive, reliable and professional services – from planning and design to construction and long-term maintenance of infrastructure projects. Its closely related company Garnett Interock d.o.o. supports the joint development of advanced infrastructure solutions.

GPO's vision is to become the leading provider of external signalling and safety systems for Slovenian railways and to expand its knowledge and services to international markets. Its mission is to ensure quality, professionalism and partner satisfaction by delivering projects on time and at competitive prices.

PRODUCTS AND SERVICES RELEVANT FOR UKRAINE

- Railway infrastructure: installation of level crossings, telecommunications systems, external signalling and safety devices, cabling, switch heating systems and overhead line construction.
- Telecommunications: construction and assembly of steel towers, installation of RDS towers for railway traffic, and erection of all types of steel structures.
- Design and planning: traffic management and control systems for roads and tunnels, traffic signals and traffic signage solutions.
- Optical networks: construction of broadband-ready optical networks.

COOPERATION INTERESTS

- Local partners, contractors, investors, municipalities and engineering companies.

Sandi Povše
Quality Manager

+386 40 499 921

simon.strnad@imp-ta.si

www.imp-ta.si

SHORT DESCRIPTION OF THE COMPANY

IMP Armature is a Slovenian manufacturer of high-quality industrial valves with over 50 years of experience. Its product range includes gate valves, butterfly valves, house connection valves, check valves, hydrants, strainers and pipe fittings for drinking water supply, wastewater management, industrial water systems, heating and fire-fighting applications.

Key strengths include in-house development, modern manufacturing technologies, expert technical support and the ability to tailor solutions to customers' specific needs.

Nearly 80% of revenue comes from international markets, with exports to approximately 50 countries worldwide. IMP Armature has been exporting to Ukraine since 2013, supplying products through local partners to water utility companies and industrial end users. Its extensive expertise in water infrastructure solutions makes it a reliable partner for Ukraine's reconstruction and modernisation projects.

PRODUCTS AND SERVICES RELEVANT FOR UKRAINE

IMP Armature's products are particularly relevant for the reconstruction and modernisation of Ukraine's water supply infrastructure. The company offers a wide range of valves and fittings – gate valves, check valves, hydrants, strainers and pipe fittings – suitable for drinking water distribution networks, water treatment facilities and other water infrastructure projects. The products provide reliable and efficient operation, high durability and long service life, contributing to the safety and long-term sustainability of water supply systems while reducing maintenance requirements and long-term operating costs.

COOPERATION INTERESTS

- Municipalities and municipal utility companies – to learn about their needs in the reconstruction of water infrastructure.
- Construction companies involved in infrastructure reconstruction projects, and engineering firms that design and plan such projects.

IMP IoT hydrant

Kontron d.o.o.

Tomaž Miklavčič
Head of Sales Support and Operations

info.slovenia@kontron.com

www.kontron-slovenia.com

SHORT DESCRIPTION OF THE COMPANY

Slovenia's Kontron d.o.o. is a leading European provider of customised and highly reliable communication solutions for a smart, safe and better-connected future. Known as Iskratel until 2023, the member of the Kontron AG Group offers software-defined access solutions, develops and manufactures high-quality OLTs and CPE in its own innovation and production centres, including at its headquarters in Slovenia, and supports customers in more than fifty countries worldwide.

Its wide portfolio covers communications solutions for the digitalisation of various industries, mobile private networks with its own end-to-end 5G portfolio, a sovereign industrial cloud platform, system integration of transport solutions, and electronics manufacturing and development services for production, automotive, aerospace and defence.

PRODUCTS AND SERVICES RELEVANT FOR UKRAINE

European technology for critical infrastructure – designed, developed and manufactured in Slovenia:

- telecommunications infrastructure, network modernisation and GPON broadband access,
- Mobile Private Networks (MPN) for transportation, energy, utilities, industry and public safety,
- railway, subway and airport communications, including FRMCS, operational and technical communications, MCX and PIS/PAS systems,
- geo-redundant telecommunications and dispatch systems, power supply and backup power for critical infrastructure,
- Electronics Manufacturing Services (EMS), custom PCBAs, embedded computer modules and deployment electronics,
- secure communication receivers, mission-critical control systems, flight and motor controllers, and high-sensitivity cameras and gimbal systems.

With engineering, industrialisation and manufacturing under one roof in Slovenia, Kontron provides trusted Made in EU solutions, secure supply chains, rapid customisation and long-term lifecycle support for infrastructure modernisation and reconstruction projects.

Key sectors: telecommunications networks; railways, subway and airports; nuclear energy; energy and gas; security and defence; healthcare and public infrastructure.

kontron

SHORT DESCRIPTION OF THE COMPANY

MAKSIAL is a Slovenian R&D engineering company, established in 2009, offering all-in-one engineering that brings together experts in civil, mechanical, electrical, and chemical and process engineering. The company designs process and production equipment and develops technological solutions for chemical, pharmaceutical, food and manufacturing plants.

Its services cover 3D architectural and civil design, 3D industrial logistics, 3D mechanical, electrical and chemical engineering, ORC systems for converting waste heat into electricity, AI-based visual defect detection, 3D scanning and revamping of factories, 3D robot engineering and process management.

References include Kansai Helios, Žito, Gorenje and Novartis, and engineering cooperation with Allfest (Germany), Enogia (France), Metal Sistemi Plus (Serbia) and PORTON (China). MAKSIAL has completed projects in more than ten countries.

PRODUCTS AND SERVICES RELEVANT FOR UKRAINE

All-in-one engineering for new and existing chemical, pharmaceutical, food and beverage and manufacturing plants, as well as wastewater treatment plants. MAKSIAL designs robotic simulations of new or existing production lines and implements innovative 3D modular mechanical and electrical engineering and 3D revamping, adding an estimated 20–30% value for clients.

SHORT DESCRIPTION OF THE COMPANY

Mega M d.o.o. (MegaTel) is a Slovenian technology and engineering company operating primarily in the B2B sector, providing advanced solutions in energy, e-mobility, telecommunications and digital infrastructure. Its core services include the development and implementation of EV charging infrastructure, intelligent energy management systems, battery storage integration, renewable energy solutions, cloud-based services and ICT infrastructure.

The company combines expertise in electrical engineering, energy systems, project management, digitalisation and the integration of advanced technologies. Its solutions incorporate AI-supported algorithms, smart control systems and modern communication protocols to improve energy efficiency and operational performance.

Mega M has experience in delivering complex projects for business customers, public institutions and municipalities, in cooperation with international technology providers, equipment manufacturers and business partners.

PRODUCTS AND SERVICES RELEVANT FOR UKRAINE

Integrated solutions for energy infrastructure, e-mobility and digitalisation: EV charging infrastructure, smart energy management systems, battery energy storage, renewable energy integration, cloud-based monitoring and optimisation platforms, and advanced ICT infrastructure. These solutions suit public infrastructure, municipalities, commercial and industrial facilities, transport networks and renewable energy projects. By combining intelligent control, AI-supported optimisation and modern energy technologies, Mega M helps reduce energy costs, improve energy security, increase infrastructure reliability and accelerate the transition to sustainable energy systems.

PETERKA PARTNERS

YOUR CEE LAW FIRM

SHORT DESCRIPTION OF THE COMPANY

PETERKA PARTNERS is a modern, independent full-service law firm with a special commitment to the region of Central and Eastern Europe. The only truly Central European law firm that has built, from its Czech roots, its own strong regional presence in key markets, PETERKA PARTNERS offers pan-regional legal and tax competency and a dynamic alternative to the top law firms, both international and purely local.

Operating fully owned offices across the region – in the Czech Republic, Slovakia, Poland, Ukraine, Bulgaria, Romania, Hungary, Croatia, Slovenia and Austria, and also covering Serbia, Bosnia and Herzegovina and others – PETERKA PARTNERS acts as “one firm” and leverages its integrated infrastructure, legal excellence, industry insight and deep local expertise to deliver complex legal solutions with exceptional commercial value for its clients.

SERVICES RELEVANT FOR UKRAINE

- Market entry and company setup: choosing a structure, registering a subsidiary or branch, and corporate governance.
- Investments and transactions: legal due diligence, deal structuring, M&A and joint ventures with Ukrainian partners.
- Commercial contracts: agreements with contractors, suppliers, distributors and partners for reconstruction projects.
- Employment: hiring local staff, work permits for foreign specialists, HR documents and compliance.
- Tax: structuring investments and cross-border transactions, and tax compliance in Ukraine.
- IT and IP: IT-sector structuring (including Diia City), protection of IP and technology, and data protection.

COOPERATION INTERESTS

- Investors.

SHORT DESCRIPTION OF THE COMPANY

SICOM INVEST d.o.o. is a Slovenian consulting and engineering company with extensive experience, established local partnerships and an in-depth understanding of the Ukrainian business environment. To strengthen its operations in Ukraine, the company holds an equity interest in a Ukrainian company, providing a direct corporate presence in the local market and facilitating cooperation with Ukrainian enterprises, institutions and international partners.

SICOM INVEST serves as a strategic link between European and international investors, technology providers, financial institutions and Ukrainian companies. It focuses on identifying, developing and facilitating investment opportunities in Ukraine's key economic sectors – energy, telecommunications, transport and infrastructure – and supports international partners in entering the Ukrainian market, establishing local partnerships, coordinating business activities and developing investment projects.

In its domestic market, the company has developed and implemented several solar power projects integrated with battery energy storage systems (BESS), contributing to renewable energy infrastructure, energy efficiency and energy independence.

SERVICES RELEVANT FOR UKRAINE

SICOM INVEST facilitates cooperation between Ukrainian public and private stakeholders and international investors, engineering companies, equipment manufacturers and financial institutions, with emphasis on:

- energy infrastructure: modernisation, reconstruction, energy efficiency and new energy facilities,
- telecommunications: development and modernisation of networks and digital infrastructure,
- transport and logistics: railway infrastructure, transport systems and logistics facilities,
- industrial and public infrastructure: reconstruction and development of strategically important facilities.

THE PLATFORM

The platform “Slovenia Connects – Rebuild Ukraine”, run by the Centre for European Perspective, connects and informs Slovenian institutions, the expert public and the private sector on Ukraine’s recovery and reconstruction efforts, opportunities and existing financial and other instruments. It also connects Ukrainian and Slovenian public and private actors with shared interests and focuses.

PRIORITY SECTORS WHERE SLOVENIAN CAPABILITIES MEET UKRAINIAN NEEDS

- Energy resilience, energy efficiency and the green transition,
- Environmental infrastructure, water and waste management,
- Construction, engineering and modern municipal infrastructure,
- Industrial technologies, mechanical engineering and automation,
- Digital solutions and smart infrastructure,
- Pharmaceuticals, healthcare and medical technologies.

BUSINESS OPPORTUNITIES IN UKRAINE

- Commercial B2B cooperation with Ukrainian companies,
- Public procurement and reconstruction projects,
- Projects financed by donors and international financial institutions,
- Investments, joint ventures and technology partnerships.
