1. ABC NEPREMIČNINE d.o.o.

Turnover: approx. 1 mio EUR (*to be confirmed – exact figure for 2023 missing*)

Export: 0 %

Number of Employees: 11

Searching Contacts: real estate investors, developers, construction and logistics companies, tourism investors, and companies interested in acquiring land or buildings in Slovenia for production, service, logistics, or tourism purposes.

Participants: Mr. Andrej Kuplenk, Director

Company Overview

ABC Nepremičnine d.o.o. is a leading real estate agency operating in Slovenia and Croatia since 1996. The company provides comprehensive, high-quality real estate services, covering the full spectrum from property sales and acquisitions to rentals, leasing, property management, and investment advisory. With nearly three decades of experience, ABC Nepremičnine has established a strong reputation in the regional real estate market, recognized for its professional approach, dedication to client satisfaction, and high standards of service.

Vision and Mission

Vision: To be the preferred partner for real estate investment and development in Slovenia and Croatia, recognized for expertise, reliability, and innovative solutions.

Mission: To deliver reliable, professional, and client-oriented real estate services, supporting clients in achieving their property and investment goals while maintaining the highest standards of quality and long-term satisfaction.

Services

ABC Nepremičnine d.o.o. offers a broad range of real estate services, including:

- *Property sales and acquisitions (residential, commercial, and land)*
- *Rental and leasing services*
- *Property management and maintenance*
- *Real estate investment advisory and market analysis*
- *Support for investors entering the Slovenian and Croatian markets*

Market Interest / Delegation Goals

The company participates in international business delegations to promote Slovenia as an attractive destination for real estate investment. ABC Nepremičnine is particularly focused on connecting with potential buyers and investors seeking land or buildings for production, services, logistics, or tourism projects. The company is open to partnerships for development projects and is interested in investors of various sizes, both regional and international, across residential, commercial, and tourism sectors.

2. AVP d.o.o.

Turnover: approx. 600.000 EUR

Export: 60 %

Number of Employees: 6

Searching contacts: manufacturers of industrial robots and automation components, companies in robotics, welding automation, and advanced manufacturing, as well as partners for joint development and integration projects.

Participants: Mr. Kancijan Zatler, General Manager

Company Overview

AVP d.o.o. is a Slovenian engineering company with over 35 years of experience in automated welding solutions. The company specializes in designing and delivering custom machines for industrial welding, including circular and longitudinal systems, welding positioners, and fully automated workstations. Unlike standard equipment providers,

AVP focuses on tailor-made solutions to meet specific customer requirements. AVP serves clients across metal processing, pressure vessels, energy, and general manufacturing industries, primarily in Europe. Beyond mechanical design, the company provides complete system integration, encompassing control systems, motion control, and process optimization, with an emphasis on reliability, precision, and long-term operational stability.

Vision and Mission

Vision: To strengthen its position as a leading provider of advanced automated welding solutions through international collaboration and innovation.

Mission: To deliver reliable, precise, and customized automation solutions that enhance efficiency and quality in industrial production, ensuring long-term client satisfaction and operational excellence.

Services

AVP offers a comprehensive suite of services, including:

- Custom automated welding machines
- Circular and longitudinal welding systems
- Welding positioners and automated workstations
- Robotic and automation system integration
- Development of control and motion systems
- Process optimization and efficiency improvement
- Tailor-made engineering solutions for specific industrial needs

China Market Interest / Delegation Goals

AVP identifies Chengdu–Chongqing as a key hub for automation and advanced manufacturing. The company seeks long-term cooperation through:

- Partnerships with local robot and automation manufacturers
- Sourcing cost-effective automation components (robots, controllers, welding heads, etc.)
- Joint development and integration projects combining European engineering expertise with Chinese manufacturing capabilities

3. BITS DYNAMICS, Dejan Vidovič, s.p.

Turnover: approx. 130,000 EUR (2023)

Export: 90%

Number of Employees: 1

Searching contacts: AI companies, robotics manufacturers, biotech/genomics research institutions, and strategic partners for AI-driven automation solutions.

Participants: Mr. Dejan Vidovič – Founder/CEO

Company Profile

BITS DYNAMICS, DEJAN VIDOVIČ S.P., headquartered in Ljubljana, Slovenia, is a technology-driven company specializing in artificial intelligence, robotics, and advanced automation solutions. The company develops scalable systems that integrate AI with real-world applications, cross-border e-commerce, and industrial automation.

Innovation is at the core of BITS DYNAMICS, with a strong focus on practical implementation, applied sciences, and adaptive automation solutions. The company delivers flexible, scalable systems tailored to industry needs and supports co-development with partners. Key sectors include smart manufacturing, genomics, and robotics, with solutions designed to enhance efficiency, data intelligence, and automation capabilities.

Vision and Mission

Vision: To establish BITS DYNAMICS as a strategic partner in AI, robotics, and applied automation, fostering innovation and high-tech solutions across industries.

Mission: To provide advanced, scalable, and adaptable AI-driven automation solutions that create value for global partners and support technology-driven growth.

Services / Solutions

- AI-driven automation systems
- Robotics and smart manufacturing solutions
- Intelligent data processing platforms
- Scalable, co-developable technology systems
- Industry-specific solutions for genomics, agriculture, and industrial automation

China Market Interest / Delegation Goal

- BITS DYNAMICS aims to establish strategic partnerships in AI, robotics, and applied automation, including:
 - Joint development with Chinese partners
 - Market expansion and deployment of intelligent systems
 - Technology transfer and long-term collaborations

With a focus on innovation and practical application, BITS DYNAMICS offers China a partner with agility, expertise, and the ability to co-develop advanced solutions aligned with the country's strategic high-tech initiatives.

4. BREZMEJNI UM, Domen Jere s. p.

Turnover: approx. 30,000 – 100,000 EUR (2023)

Export: 25 %

Number of Employees: 1–5

Searching contacts: distributors and importers in oral care products, healthcare and wellness products, disinfection products (消毒产品), pharmacy and clinic supply chains, and e-commerce distributors (Tmall, JD, Douyin).

Participants: Mr. Domen Jere – Founder/Director

Company Profile

BREZMEJNI UM, Domen Jere s.p., headquartered in Slovenia, is a consultancy specialized in advanced learning methodologies and international business development, with a particular focus on the China market. The company operates in two main areas: cognitive performance and learning systems, and business consulting for China market entry.

In cognitive performance, BREZMEJNI UM develops and applies advanced memory techniques, including structured encoding systems and memory palace methodologies. The company trains individuals and organizations in effective learning, information retention, and knowledge structuring, designing frameworks for high-performance learning environments.

In business consulting, BREZMEJNI UM supports European companies entering the Chinese market by identifying and negotiating with local partners, providing guidance on regulatory pathways, and navigating Chinese business culture, communication, and market dynamics.

Vision and Mission

Vision: To be a trusted bridge for European companies entering China, combining expertise in learning, innovation, and international business development.

Mission: To deliver high-quality advisory services and innovative product distribution strategies that enable European companies to successfully enter and scale in the Chinese market.

Services / Solutions

- Advanced learning systems and cognitive performance training
- Development of structured memory and knowledge frameworks
- Business consulting for China market entry
- Partner identification and negotiation support in China
- Regulatory and market guidance for European companies
- Distribution strategies for premium oral care and healthcare products

China Market Interest / Delegation Goal

- BREZMEJNI UM seeks to build long-term partnerships in China by:
 - Identifying reliable local distributors and importers
 - Testing market entry via CBEC and offline channels
 - Understanding regulatory pathways for oral care and disinfection products
 - Scaling high-quality European products across China

By combining European quality standards, clinical validation, and differentiated market positioning with expertise in Chinese market engagement, BREZMEJNI UM offers Chinese partners a reliable, low-risk pathway for introducing premium oral care and healthcare solutions.

5. DOMEL d.o.o.

Turnover: approx. 187 Mio EUR (to be confirmed – assumed 2023)

Export: 90–95 %

Number of Employees: 1.200

Searching contacts: manufacturers of commercial cleaning robots, humanoid robots, and drones, as well as distributors and partners for laboratory equipment and water monitoring systems.

Participants: Mr. Boštjan Demšar, Domel Electric Motors Suzhou Co., Ltd - Direktor

Company Overview

DOMEL d.o.o., headquartered in Železniki, Slovenia, was established in 1946 and develops and manufactures electric motors, vacuum motors, blowers, and laboratory equipment, powering over 300 million devices worldwide. Innovation drives DOMEL, with more than one-third of sales coming from products developed in the past three years. The company maintains high in-house development capabilities and vertically integrated production, ensuring quality, flexibility, and technological excellence. DOMEL's products serve multiple industries, including household appliances, HVAC, power tools, automotive, medical, and energy. Manufacturing facilities in Slovenia, Serbia, and China support the company's global presence. The company emphasizes sustainability through energy-efficient, durable, and environmentally friendly solutions aligned with international standards.

Vision and Mission

Vision: To strengthen its position as a global leader in advanced electric motor solutions and sustainable technologies.

Mission: To develop innovative, energy-efficient, and high-quality solutions that create value for global partners while supporting sustainable development.

Services / Solutions

DOMEL offers a wide range of products and services, including:

- Electric motors, vacuum motors, and high-efficiency drives (BLDC, custom solutions)
- Blowers and HVAC/industrial components
- Professional and robotic cleaning systems
- Laboratory equipment and water monitoring systems
- Custom development, OEM partnerships, and co-engineering
- Engineering support and collaborative R&D with global partners

China Market Interest / Delegation Goals

DOMEL aims to expand collaboration in robotics, automation, and advanced manufacturing by:

- Partnering with manufacturers of cleaning robots, humanoid robots, and drones to integrate motor solutions
- Expanding the presence of laboratory equipment through distributors and strategic partners
- Leveraging 20+ years of experience in China, including the Suzhou facility, to build long-term partnerships and strengthen its global footprint

6. DRAGINC KOSTJA s. p.

Turnover: approx. 30,000 – 100,000 EUR (2023)

Export: 20 %

Number of Employees: 1–5

Searching contacts: distributors and importers in oral care products, healthcare and wellness products, disinfection products (消毒产品), pharmacy and clinic supply chains, and e-commerce distributors (Tmall, JD, Douyin).

Participants: Mr. Kostja Draginc – Founder/Director

Company Profile

KOSTJA DRAGINC s. p., headquartered in Ljubljana, Slovenia, specializes in advanced construction solutions, with expertise in innovative finishing works, infrastructure integration, and logistics optimization for construction projects. The company is developing solutions in smart construction methodologies, optical connectivity infrastructure, technical systems integration, and efficient logistics for residential and commercial developments.

Additionally, Kostja Draginc s. p. supports international business initiatives, including the introduction of selected European healthcare and oral care products into foreign markets. This includes partner identification, logistics structuring, regulatory compliance, and operational setup.

Vision and Mission

Vision: To establish trusted partnerships in China for distributing high-quality European healthcare and oral care products, while leveraging advanced construction expertise.

Mission: To deliver innovative, reliable, and premium European products to Chinese consumers through strategic distribution and market-entry partnerships, while providing expertise in construction and infrastructure solutions.

Services / Solutions

- Advanced finishing works and construction integration
- Smart construction and modern building technologies
- Infrastructure and logistics optimization
- Technical system integration for residential and commercial projects
- Distribution of premium European oral care, healthcare, and disinfection products
- Market-entry support for CBEC and offline channels

China Market Interest / Delegation Goal

- Kostja Draginc s. p. aims to build long-term partnerships in China by:
 - Identifying reliable local distributors and importers
 - Testing market entry via CBEC and offline channels
 - Navigating regulatory pathways for oral care and disinfection products
 - Scaling high-quality European products across China

With a focus on European quality standards, clinical validation, and differentiated product positioning, Kostja Draginc s. p. offers Chinese partners low-risk market entry, fast deployment, and access to premium oral care and healthcare solutions.

7. GEA COLLEGE – Faculty of Entrepreneurship

Turnover: approx. 4 Mio EUR (to be confirmed – 2023)

Export: 0 %

Number of Employees: 28

Searching contacts: universities, business schools, companies, startups, and SMEs interested in entrepreneurship education, executive training, innovation, and international collaboration.

Participants: Mrs. Katja Kraškovic, Director and Dean

Company Overview

GEA College is a private higher education institution and a leading provider of entrepreneurship education in Slovenia, with over 30 years of experience. Its ecosystem comprises the Faculty of Entrepreneurship, a Higher Vocational College, specialized training units, and a business incubator.

The College offers undergraduate and graduate programs, executive education, professional certifications, and tailor-made corporate training. It specializes in entrepreneurship, business development, digital marketing, and cybersecurity. Learning is practice-oriented, combining projects, mentorship, and active collaboration with industry partners.

Internationalization is central to GEA College, with over 60 partner institutions and active participation in Erasmus+ programs, enabling mobility, joint projects, and global knowledge exchange.

Vision and Mission

Vision: To be a leading international hub for entrepreneurship education, connecting European and global knowledge ecosystems.

Mission: To empower individuals and organizations through practical, high-impact education and strong academia–industry collaboration.

Services

- Undergraduate and graduate programs in entrepreneurship and business
- Executive education and corporate training
- Tailor-made corporate programs and professional certifications
- Lifelong learning initiatives
- Entrepreneurship support and business incubator collaboration
- International mobility and joint research or education projects

China Market Interest / Delegation Goals

GEA College seeks long-term partnerships in China, focusing on:

- Collaboration in entrepreneurship and innovation education
- Development of joint programs and pilot initiatives
- Student and staff exchanges
- Executive education and professional training
- Supporting companies bridging European and Chinese markets through talent development and knowledge transfer

GEA College – Selected Universities for Potential Cooperation in Chengdu

1. Sichuan Technology and Business University (STBU)

private, application-oriented university

Chengdu (Hi-tech District – western part of the city)

Interesting because:

- comprehensive business and technology university focused on applied knowledge, entrepreneurship, and employability
- recognized as an advanced institution in innovation and entrepreneurship education, with over 800 student awards in discipline and technical skills competitions
- very high graduate employability rate (over 96%)
- private institution
- strong emphasis on practice-oriented education

2. Chengdu Neusoft University

private university established by Neusoft

Interesting because:

- strong focus on IT and business, especially through the School of Information and Business Management
- programs combine business management and information systems

3. Chengdu University – Business School

type: public, mid-sized university (approx. 30,000 students, 18 faculties/schools)

Business School:

- offers programs in Business Administration, Accounting, etc.
- includes a Bachelor's program in Business Management for international students (4 years)

Interesting because:

- a classic business school with international programs – a good basis for Erasmus+-like cooperation (although China is not part of Erasmus)
- experience with international students and established English/international infrastructure
- manageable size (not a mega-university like Sichuan University), which can facilitate practical cooperation

4. Southwestern University of Finance and Economics (SWUFE)

leading university in finance, business, and economics in Chengdu

#1 in Western China in finance/economics

extensive international cooperation (130+ partners, including EU institutions)

Ideas for cooperation:

- bilateral agreements in business studies
- joint summer schools (e.g. “Doing Business in EU & China”)
- joint projects in SMEs, family business, food industry, tourism – aligned with GEA’s strategic priorities

8. NORD COMMUNICATIONS ADRIA, Vanja Kavčič s. p.

Turnover: approx. 20,000 EUR (2023)

Export: 0 %

Number of Employees: 1

Searching contacts: media outlets, PR agencies, and event management partners.

Participants: Mrs. Vanja Kavcic – Editor in Chief

Company Profile

Nord Communications Adria, operating under Vanja Kavčič s.p., is an English-language media outlet based in Ljubljana, Slovenia. Established by internationals for internationals, it serves a globally minded audience, connecting people, ideas, and projects that transcend borders. Together with its sister platform, The International, a regional event hub, it facilitates cross-border collaborations in business, culture, tourism, education, and sports.

Registered with the Slovenian Ministry of Culture since April 2025, the company brings together professionals in international relations, PR, diplomacy, communications, and event management. Nord Communications Adria focuses on delivering meaningful, high-quality content to globally oriented decision-makers, including CEOs, diplomats, academics, entrepreneurs, and thought leaders across Slovenia and the region.

Vision and Mission

Vision: To be a leading English-language platform in Slovenia promoting international collaboration, cross-border knowledge exchange, and impactful storytelling.

Mission: To deliver context-rich, meaningful media content and facilitate connections between individuals and organizations shaping the future of business, culture, and society.

Services / Solutions

- English-language media content for international audiences
- Reporting on trade, culture, tourism, education, and sports initiatives
- PR and event management collaboration
- Platform for cross-border networking and professional connections
- Strategic media partnerships for global visibility

China Market Interest / Delegation Goal

- Nord Communications Adria seeks media and strategic partnerships in China to:
 - Expand international visibility and cross-border collaborations
 - Facilitate knowledge exchange and networking between Slovenian and Chinese stakeholders
 - Promote initiatives in culture, trade, tourism, and education
 - Support event and media collaborations targeting globally minded audiences

With a focus on high-quality, internationally relevant content and a network of professionals across sectors, Nord Communications Adria offers Chinese partners a platform for visibility, engagement, and collaboration with decision-makers and innovators in Slovenia and the broader region.

9. RIKO d.o.o.

RIKO, celovite tehnološke rešitve, d. o. o.
Bizjanova ulica 2, 1000 Ljubljana, Slovenija
T: +386 (0)1 5816 300, F: +386 (0)1 5816 340, E: riko@riko.si, W: www.riko.si

Turnover: 246.227.296,23 EUR (2025)

Export: 83%

Number of Employees: 187

Searching contacts: companies for collaboration in project design and implementation across energy, environmental protection, transport, information infrastructure, logistics, and construction; potential partners for joint projects in international markets (including third and European markets), as well as suppliers and technology partners.

Participants: Mr. Janez Škrabec, CEO

Company Overview

RIKO d.o.o. is one of Southeast Europe's largest engineering and project development companies, specializing in turnkey solutions across multiple industries. The company delivers complex infrastructure and industrial projects in energy, environmental protection, logistics, advanced manufacturing, and sustainable construction. With a skilled team, broad service offerings, and extensive international experience, RIKO is a trusted provider of green and digital transformation solutions. The company combines engineering expertise with strong project management, delivering technologically advanced and environmentally responsible projects tailored to client needs. RIKO's international presence, including units in Germany, the UK, Serbia, Croatia, North Macedonia, Ukraine, and Belarus, enables collaboration with a global network of partners, financial institutions, and export agencies to ensure high-quality project execution.

Vision and Mission

Vision: To be a leading provider of integrated engineering solutions supporting green and digital transformation internationally.

Mission: To deliver reliable, efficient, and sustainable, turnkey solutions combining engineering excellence, international experience, and a strong commitment to clients and long-term partnerships.

Services

- Turnkey project design and implementation
- Energy infrastructure and renewable energy solutions
- Environmental protection and sustainable technologies
- Transport and information infrastructure systems
- Logistics systems and automation
- Industrial and advanced manufacturing systems
- Construction and integrated infrastructure projects

Market Interest / Delegation Goals

RIKO seeks **partnerships** in energy, environmental protection, transport, logistics, and infrastructure, focusing on project development and implementation, **entry into third and European markets**, and **collaboration** with EPC contractors, investors, public sector entities, and technology partners.

10. ROTO INOX d.o.o.

Turnover: 8.12 M€ (2023)

Export: 76 %

Number of Employees: 43

Searching contacts: pharmaceutical and biopharmaceutical companies, engineering firms in the pharmaceutical sector, distributors, sales partners, and end customers interested in EU-manufactured process equipment.

Participants: Mr. Blaž Pavšič, CTO

Company Overview

ROTO INOX d.o.o. develops and manufactures process equipment for the pharmaceutical, biopharmaceutical, chemical, and biotechnology industries. The company provides systems ranging from pilot and R&D units to fully integrated production skids, engineered with modular design, GMP compliance, and complete documentation. Prefabricated systems ensure fast delivery, smooth integration, and efficient qualifications.

With over 35 years of experience, ROTO INOX maintains long-term partnerships with leading pharmaceutical companies. The company combines in-house engineering, fabrication, assembly, and testing, ensuring full control over quality, traceability, and project execution. ROTO INOX is recognized for its flexibility, customer-oriented approach, and the ability to deliver custom-made systems for complex production processes.

Vision and Mission

Vision: To be a recognized global provider of high-quality, flexible, GMP-compliant process equipment.

Mission: To deliver reliable, fully customized process systems through in-house expertise, engineering excellence, and deep understanding of regulated environments.

Services

- **Process Equipment:** process vessels, bioreactors, fermenters
- **Production Skids:** buffer/media preparation, perfusion, filtration, bioreactor/fermenter, compounding/formulation
- **Utility Skids:** WFI & PW storage and distribution, CIP/SIP (COP/SOP), chemical dosing, storage and distribution

Market Interest / Delegation Goals

ROTO INOX seeks partnerships with:

- Pharmaceutical and biopharmaceutical companies
- Engineering firms in the pharmaceutical sector
- Distributors, integrators, and end customers interested in EU-manufactured process equipment
