SLOVENIA

SLOVENIAN TRANSPORT & LOGISTIC DELEGATION TO INDIA

Mumbai, Chennai, 20. – 24. November 2023

Port of Koper

Slovenia – Your logistics gateway to Europe – Green, Creative, Smart

Welcome to Slovenia, your logistics gateway to Europe!

Dear reader,

Explore Slovenia and its diverse range of innovative, creative and smart products and services that can provide exceptional business opportunities for ventures like yours.

Situated in Central Europe with direct access to the Mediterranean through the Port of Koper, the country offers an efficient supply chain entry into Central and Eastern Europe. The Port of Koper, the shortest route from South Asia via the Suez Canal, trims 2,000 nautical miles and 5-7 days in transit time compared to Northern European ports.

Slovenia is also committed to enhancing airport and railway infrastructure, fostering an optimal business environment in our region.

Slovenia's economy is sustainable and user-oriented, offering creative, innovative and accessible solutions that contribute to long-term societal development. Slovenian companies enjoy a robust presence in global markets and are renowned for delivering high-quality products, services and solutions. Slovenians are celebrated for their innovation, professionalism, reliability and adaptability.

Slovenia, with top-tier logistics services, offers the shortest, most innovative route to Central, Eastern European, and Balkan markets, serving 300 million consumers. Choosing Slovenia as your European entry point ensures efficiency and success.

These are just a few compelling reasons why Slovenia should be your first choice as a reliable business partner or the starting point for your business endeavors.

At SPIRIT Slovenia Business Development Agency and Chamber of commerce and industry of Slovenia - Transport association, we are committed to helping you succeed in partnership with Slovenia's infinite innovative, creative and smart potential.

Seize the opportunity to learn more about Slovenia's comparative advantages in the field of transport and logistics. You can meet the representatives of this year's delegation at a series of business networking events to familiarize yourself with their high-quality transportation and logistics offerings.

EMBASSY NEW DELHI

SLOVENIA'S PRESENTATION AT TRANSPORT & LOGISTICS MUNICH, MAY 2023

H.E. Mateja Vodeb Ghosh

Slovenia - Indian Reliable and Promising Partner in EU – Central and Southeast Europe

Slovenia, part of former Yugoslavia, independent country since 1991, is also a member of European Union and NATO (2004), member of Eurozone (2007), member of Schengen group (2009) and of OECD (2010). It's economy is predominantly service and export orientated. Among most important industries are automobile components, pharmaceutical, chemicals, tourism; among most innovative sectors are sustainable mobility, smart homes, wellbeing, smart electronics, special materials, nano-technologies. The country registered strong post-pandemic recovery (8,1% growth and high employment), but like in so many other countries, high inflation, supply chain bottlenecks and other impacts from the war in Ukraine has slowed down its economic momentum. The economy still grew by 4,6% in 2022, and the forecast for 2023 is 1,2%.

Its unique geostrategic position at the crossroads of Mediterranean and Eastern Europe, and Central and Southeastern Europe, makes my country an ideal partner in the maritime and overland logistic services. It's well developed transportation and logistics sector (by sea, road, rail, and air) offers everything that exporters from India and South Asia may require.

Port Koper on the Slovenian coast is maritime gateway and hub for the markets of South Germany, North Italy, Austria, Hungary, Czechia, and Slovakia. It has developed rapidly since 1991 and

evolved into one of the largest ports in the northern Adriatic. Its market niche: industrial products shipped in containers and cars.

The country's second key logistics hub is Ljubljana's Brnik airport. The airport saw investments of over 60 million euros into the development and modernization of the airport's infrastructure, and an additional 78 million euros in the cargo infrastructure. State of the art facilities at the cargo terminal made Brnik one of the most important cargo airports in the region, and a key hub for drugs and other pharmaceutical products in Central and Eastern Europe.

This year's visit of Slovenian Logistic and Transport Delegation is the follow-up to its 2019 visit. Pandemic delayed the follow up visit to 2023 but what augurs well is the trade dynamic between Slovenia and India. Trade in goods have exceeded 676 million euros in 2022 and the upward trend continues. I hope that this upward trade dynamic will also reflect in transport logistic cooperation between Slovenia and India.

I FEEL
SLOVENIA

GREEN.
CREATIVE
SMART.

We think Green.

Slovenian transport and logistics companies represent an important link in international supply chains; their environmentally sustainable, energy-efficient, and innovative customer-centred solutions meet the highest standards.

Slovenia's ideal location and dedication to low-impact ecological solutions make it the obvious choice compared to all other methods of reaching the core of Europe.

We are Creative.

Slovenian logistics companies are always prepared to arrange tailor-made, creative, and cutting-edge solutions that exceed expectations, qualities which ensure that Slovenian transport and logistics companies are your ideal business partners.

Perhaps unconventional, yet globally respected; inspired, yet down to earth. And dare we say – to check all the boxes – we might just be that “out of the box” place that you are trying to find.

And yet the obvious choice.

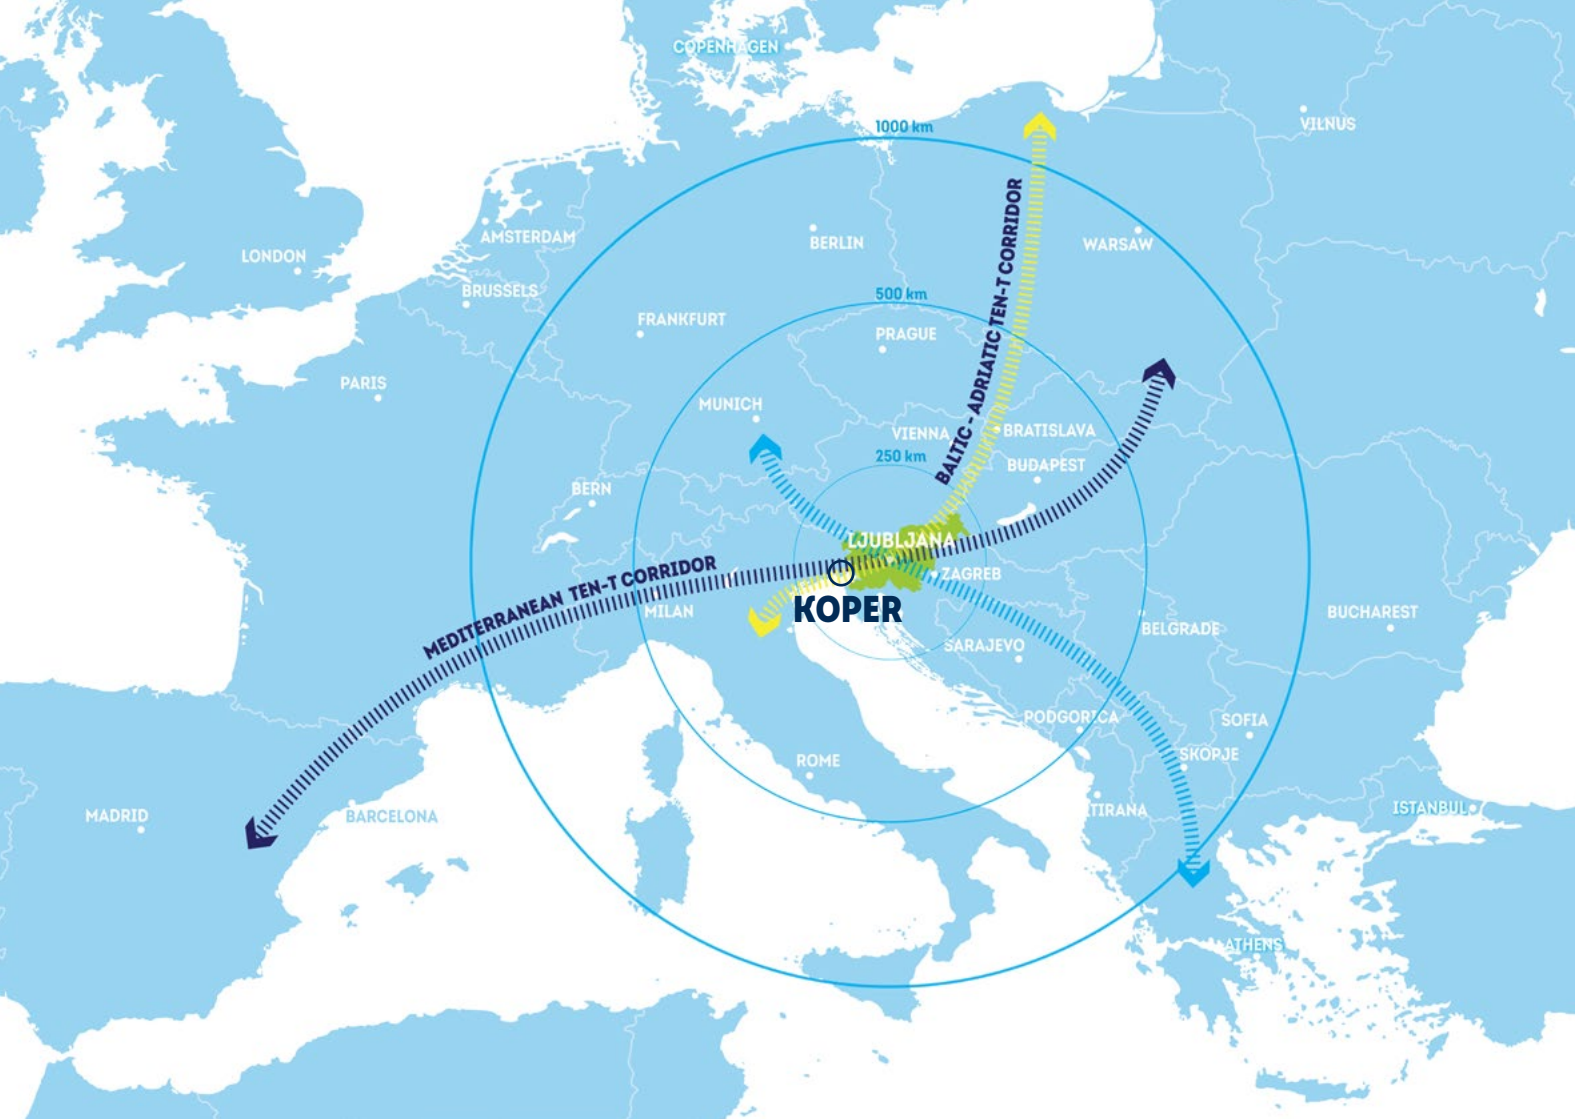

I FEEL
SLOVENIA

GREEN.
CREATIVE.
SMART.

We work Smart.

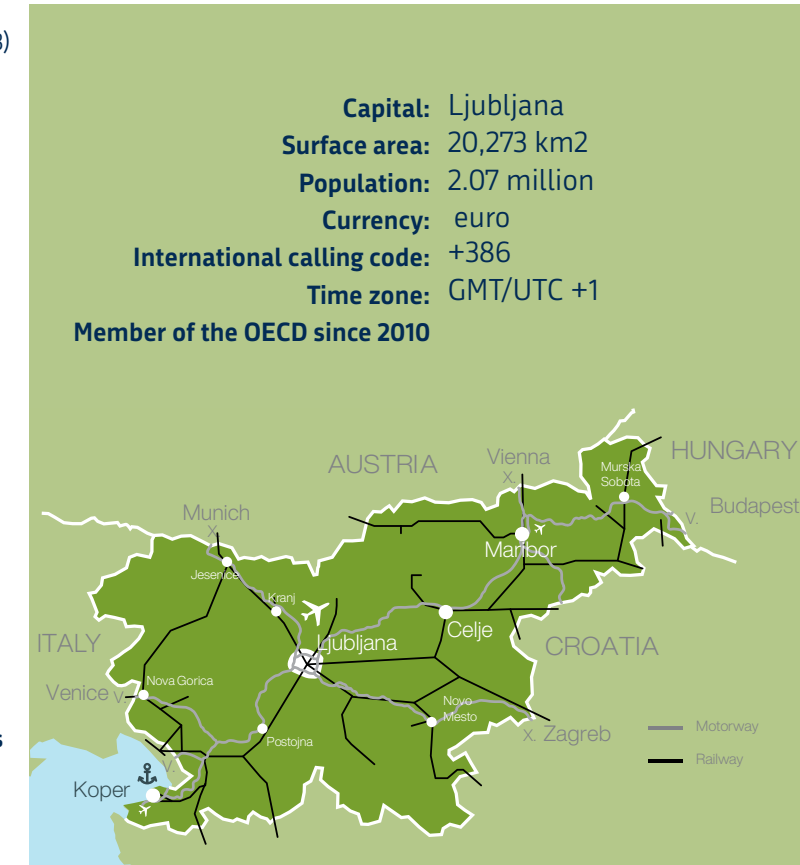

Sustainability starts with a smart supply chain. **The geographical position of Slovenia** offers the shortest and most reliable route to the markets of Central Europe, Eastern Europe, and the Balkans – **the very heart of Europe** – enabling the flow of goods to approximately 300 million consumers.

High-quality logistics services and cost-effective, flexible solutions make **Slovenian transport and logistics companies** excellent business partners.

- **Strong public health system. Life expectancy at birth: 81 years**
(Human Development Index 2019, UN)

SLOVENIA - the Shortest Route from the Far and Middle East to the Centre of Europe

Koper's proximity to the Suez Canal offers a major advantage.

Compared to the ports of the North Sea, the route via Slovenia - the Port of Koper to the major Central European capitals (Munich, Vienna, Prague, Budapest, Bratislava) - is 2,000 nautical miles shorter by sea and 500 km by land.

MUMBAI

ABOUT THE COMPANY

Luka Koper, port and logistic system, d.d., is a public limited company that develops and manages the Port of Koper, the only Slovenian seaport. The Port of Koper has a strategic geographic position in the North Adriatic region and therefore is ideal for servicing Central European markets. It represents the shortest link from the Far East via the Suez Canal to Europe, with a distance that is about 2,000 nautical miles shorter compared to other Northern European ports, enabling a transit time approximately five days shorter. A consequent advantage is the optimization of the whole supply chain, making it more efficient and leaner, with substantial cost and time savings for customers as well as CO2 savings for the environment.

SERVICES

The company operates all **12 specialized terminals** in the multipurpose port, handling every type of cargo: containers, cars, Ro-Ro, various general cargo products, dry bulk, liquid bulk, and passengers. The total throughput of the port in 2022 was 23.2 million tons, including 1 million TEUs and 800,000 car units, making Koper **the largest container terminal** in the Adriatic and one of **the most important car terminals** in Europe.
