MEET SLOVENIAN CIRCULAR AND GREEN SOLUTIONS @ EXPO2020

Dear Distinguished readers,

Slovenia has set a clear goal to achieve net zero greenhouse gas emissions by 2050 and become a climate-resilient society with sustainable development. The concept of green and circular economy as one of our strategic development priorities and a key driver of innovation and transformation that is imbedded in all sectors of Slovenian economy.

At Expo2020 in Dubai, Slovenia presents itself as a green, innovative, research-oriented country whose development and future is based on sustainability.

In certain niches, Slovenian companies, with their innovative, sustainable, and circular solutions, are among the very best in the world. When designing such products, special emphasis is put on their overall relevance for the markets, development, co-operation, and partnership within the global value chains. Principles of circular economy will be the promoters for the development of the market for high-quality secondary raw materials.

We are very proud to introduce the practices and solutions by Slovenian companies which influence the world today and tomorrow at the Expo2020 exhibition. Come and visit us at the Slovenian Pavilion from the 2nd- 16th of October.

Meet our innovative and green companies, exchange ideas and set the stage for future cooperation!

Tomaž Kostanjevec, PhD, Director
SPIRIT Slovenia Business Development Agency

CORE BUSINESS

- High pressure die casting

ABOUT THE COMPANY

BLISK CASTING, founded in 1985, is specialized in high-pressure aluminium die-casting. Over the years, the company expanded and became one of the largest aluminium die casting foundries in Slovenia. Our aim is to continue to grow and become one of the leaders on the European market.

We produce high-pressure aluminium die-casting parts but we are also equipped to produce and design tooling with a continuously growing machine park composed of high pressure die casting machines and CNC machines for milling and drilling operations

MAIN ACTIVITIES / PRODUCTS / SERVICES

- High pressure aluminum die-casting products
- Design and production of tooling
- Mechanical treatment and machining of castings
- Surface treatment and own transport of goods
- Assembly

VALUE PROPOSITION

- According to our customer's requests, we also produce prototypes used for early testing. Our customers appreciate our capacity to adapt to their needs and our flexibility. We earned the trust of numerous customers from various

ABOUT THE COMPANY

Novartis is the leading provider of medicines in Slovenia, where Lek d.d., Novartis Pharma Services Inc., and Sandoz d.d., operate. Together we are building and maintaining the reputation of a dynamic, ethical, and trusted pharmaceutical company.

We are integrated in Novartis' organizational structure, primarily in Global Drug Development, Novartis Technical Operations, Customer & Technology Solutions and generic division Sandoz, and taking care of business functions and services for the wider region.

As one of the biggest employers in Slovenia we created more than 3,350 new job opportunities over the last nine years.

MAIN ACTIVITIES / PRODUCTS / SERVICES

- Development of biologics and biosimilars as well as generic medicines,
- Manufacturing biosimilars and generics and high-quality active pharmaceutical ingredients for generic and biologic medicines,

- Manufacturing some of the key Novartis innovative medicines,
- Management of complex Sandoz development projects,
- Packaging and distributing medicines,
- Providing standardized high-quality services for the Novartis manufacturing network around the world,
- Marketing medicines in the domestic and global market.

VALUE PROPOSITION/OFFERING

Novartis is reimagining medicine to improve and extend people's lives. As a leading global medicines company, we use innovative science and digital technologies to create transformative treatments in areas of great medical need. In our quest to find new medicines, we consistently rank among the world's top companies investing in research and development. Novartis products reach nearly 800 million people globally and we are finding innovative ways to expand access to our latest treatments.

At Novartis, we aim to drive sustainability through our own operations as well as those of our suppliers. Our common goal is to be fully carbon neutral by 2030.

CORE BUSINESS

- Production of permanent magnets

ABOUT THE COMPANY

Magneti Ljubljana is a European manufacturer of permanent metallic magnets, bonded magnets and magnetic systems with a long-lasting tradition, since 1951. Our company is certified in accordance with ISO TS 16949, ISO 14001, ISO 9001, ISO 45001 standards. The company is involved in several international development projects in the field of introducing the circular economy for our industry in a specific area of consumption and reuse of environmentally and strategically sensitive raw materials. The company invests in projects to increase energy efficiency and digital transformation.

MAIN ACTIVITIES / PRODUCTS / SERVICES

- permanent metallic magnets (casted AlNiCo; sintered AlNiCo, sintered SmCo, sintered NdFeB magnets, magnetic systems);
- bonded magnets
- magnetic systems;
- soft magnetic composites;
- alloys (dental alloys, alloys for storage hydrogen energy etc.);
- R&D projects regarding direct recycling magnets, higher grades of magnets etc

MISSION STATEMENT

- We are a development and market oriented company characterized by financial stability and business success. Through innovation and business excellence we continue to fulfill our customers' demands and aim to create a working environment that encourages the development of our employees and the company as a whole in a sustainable and responsible manner.

WAAS – WATER AS A SERVICE

The WaaS services reducing the need for single-use plastic bottles by providing public access to purified drinking water, changing users’ habits and providing data for all stakeholders.

ABOUT THE COMPANY

MYWATER is a smart water company with a strong environmental and social vocation, on a mission to accelerate the world transition to sustainable and safe water consumption. By reinventing public water taps, MYWATER offers a sustainable and cheaper alternative to the single-use plastic water bottles and changing use & throw away habits.

MAIN ACTIVITIES / PRODUCTS / SERVICES

- IoT platform that controls refills,
- smart water refill station,
- designed for outdoor spaces and public places,
- data analytics and CO2 reduction report,
- enabling access to locally sourced drinking water,
- water filtration media with 99,9999% efficiency

VALUE PROPOSITION/OFFERING

- reducing the need for transport and single -use packaging,
- facilitate the transition to a circular economy,
- changing users’ habits and providing data for stakeholders,
- monthly reports on reducing of plastic waste and CO2 emissions,
- enabling to reach green strategy and SDG6, SDG9, SDG11 and SDG12 goals.

SEGMENTS THAT ARE MOST RELEVANT FOR OUR COMPANY

- mega cities with low water quality (B2B2C),
- most visited tourist destinations (B2G + B2B),
- smart water solutions (B2B).

CORE BUSINESS

- Business support and ecosystems development
- Project management and acquisition of European funds
- Sustainable business development – developing, testing and evaluation of business models
- Transition management

ABOUT THE COMPANY

NEC, Cerknica is a private institution founded in 1995. With many years of experience in interdisciplinary projects, we have specialised and operate as a competence centre for entrepreneurship, project management, sustainable development, responsible tourism, rural development and creative industries. NEC, Cerknica has been providing innovation for 26 years – both at home and abroad.

MAIN ACTIVITIES / PRODUCTS / SERVICES

- Identification of the EU funding opportunities, projects design and agile EU project management,
- Developing, testing and evaluation of business models for MSP, scale-up and start-ups,
- Implementation of RDI activities in the organisation, R&D tax relief projects in Slovenia,
- Sustainable transformations in economic, social and environmental filed.

VALUE PROPOSITION/OFFERING

- Innovation support and development of sustainable business models through understanding megatrends and systems thinking.

CORE BUSINESS

- Energy and ecology

ABOUT THE COMPANY

Ecology is becoming increasingly important in today’s world, as it tends to protect the environment from further pollution whilst, at the same time, preserving it for future generations. This is the reason why the Panvita Group has designed integrated ecological solutions.

Through these solutions the integrated food production process is put under complete ecological control. Nutrients are returned back to nature and the electricity produced through this process can be classified as “green energy”. The following activities fall within the framework of ecological activities: waste water cleaning, animal by-products (ABP) processing, and more importantly, acquiring “green” electricity from bio-gas. The Panvita Group is taking an integrated approach to meet these challenges. This is why Panvita has established and resolved waste water cleaning at the Nemščak and Mir waste water treatment plants and we also process animal by-products coming from companies within the Panvita Group. In 2006 we established our first bio-gas plant at the Nemščak pig farm. As a result, we initiated a new cycle of investments into acquiring “green” electricity from animal waste began. The Panvita Group is entering a

CORE BUSINESS

- Production of secondary raw materials from waste and residues.

ABOUT THE COMPANY

We are a company with seventy years of tradition, valuable experiences, clearly set objectives and a bold vision for the future - to become the largest provider of waste management services in Slovenia. We offer comprehensive solutions for all sorts of waste. We handle wastes as precious secondary raw material taking care of useful metal and non-metal materials to be returned into production, while preparing the residues to be returned to energy.

MAIN ACTIVITIES / PRODUCTS / SERVICES

- Production of secondary raw materials from waste and residues,
- Collecting and recycling of industrial waste,
- Research and Development of activities for waste processing,
- Laboratory analyses,
- Buying and selling of waste recyclates,
- Packing scheme,
- Production of solid recovered fuel (SRF),
- Destruction of confidential documents and destruction of goods in the presence of a commission, and,
- Environmental protection consulting.

VALUE PROPOSITION

Surovina d.o.o. is very active in the field of circular economy and actively participates in the development and introduction of new technologies that enable the transition from a linear economy to circular economy models.

Through development projects (Polykrožnost, Outdoc, Inspires, Cirthread...) it contributes to:

- Increasing the share of material recovery of waste into secondary raw materials and developing new technologies to increase competitiveness,
- Processing waste into high value-added recyclables,
- Strengthening and integrating new knowledge and competencies in the industry of the future at the global level (circular economy, robotics...).

SEGMENTS THAT ARE MOST RELEVANT FOR OUR COMPANY

- Industrial waste management,
- selling of secondary raw materials.
