SLOVENIA'S LOGISTICS 2023

Port of Koper

Slovenia – Your logistics gateway to Europe – Green, Creative, Smart

Distinguished Reader,

Slovenia's transportation and logistics sector is one of the key development priorities of the Slovene economy. Its geographical position in Central Europe, with direct access to the Mediterranean Sea through the Port of Koper, is the ideal point of entry for supply chains to Central and Eastern European markets. Why? Because the Port of Koper represents the shortest link from South Asia to the heart of Europe via the Suez Canal. This link is 2,000 nautical miles shorter and 5–7 days quicker in transit time than via any Northern European port.

These two advantages result in the optimization of the whole supply chain, thus making it more efficient and leaner, with substantial cost and time savings for the customer. In addition to its favourable geostrategic position, Slovenia has also been investing in improving airport and railway infrastructure. The latter confirms the dedication of all stakeholders to offer clients the best conditions and an environment conducive to developing their business in the region.

The Slovenian economy is sustainable and user-oriented, offering creative, innovative, and accessible solutions for people and for the long-term development of society. Numerous Slovenian companies have been present in various foreign markets for many years, as Slovenian products, services, and solutions are known for their high quality. Moreover, Slovenians are considered to be innovative, professional, reliable, and very flexible partners.

Transport Logistic Munich is the world's central meeting place for the transport and logistics industry. This year Slovenian companies will present themselves under the motto of the national communication campaign **I feel Slovenia. Green. Creative. Smart.** The campaign was launched to promote the Slovenian economy and Slovenian companies and their products and services on

foreign markets. Its goal is to actively present groundbreaking economic solutions that support the story of green, creative, and smart Slovenia and its sustainable businesses, which is a message from the Slovenian economy to foreign investors and foreign buyers of Slovenian goods and services.

We believe that Slovenia – with its high-quality logistics services, the shortest, smartest, and most innovative and reliable route to the heart of Europe – can become a logistics platform for the flow of goods to Central European, Eastern European, and Balkan markets, serving a combined 300 million consumers. Clients from the Near and Far East know that by choosing Slovenia as an entry gate to European markets they will reliably receive excellent service and top logistics and supply chain solutions.

At our group stand presenting the Slovenian transport logistics sector at Transport Logistic Munich 2023, you can personally – and promptly – obtain a competitive offer from the Slovenian transport and logistics companies exhibiting at the fair.

These are just a few of the reasons why Slovenia could be the best choice if you are looking for a reliable business partner or just a place to start your business. We at the SPIRIT Slovenia Business Development Agency operate as a one-stop shop for international companies and we are here to help you make it happen!

Come and get to know us! It will be well worth your time, you will enjoy it, and it might even help the environment at the same time.

The organisers of the presentation of Slovenian companies are:

I FEEL
SLOVENIA

GREEN.
CREATIVE
SMART.

We think Green.

Slovenian transport and logistics companies represent an important link in international supply chains; their environmentally sustainable, energy-efficient, and innovative customer-centred solutions meet the highest standards.

Slovenia's ideal location and dedication to low-impact ecological solutions make it the obvious choice compared to all other methods of reaching the core of Europe.

I FEEL
SLOVENIA

We are Creative.

Slovenian logistics companies are always prepared to arrange tailor-made, creative, and cutting-edge solutions that exceed expectations, qualities which ensure that Slovenian transport and logistics companies are your ideal business partners.

Perhaps unconventional, yet globally respected; inspired, yet down to earth. And dare we say – to check all the boxes – we might just be that “out of the box” place that you are trying to find.

And yet the obvious choice.

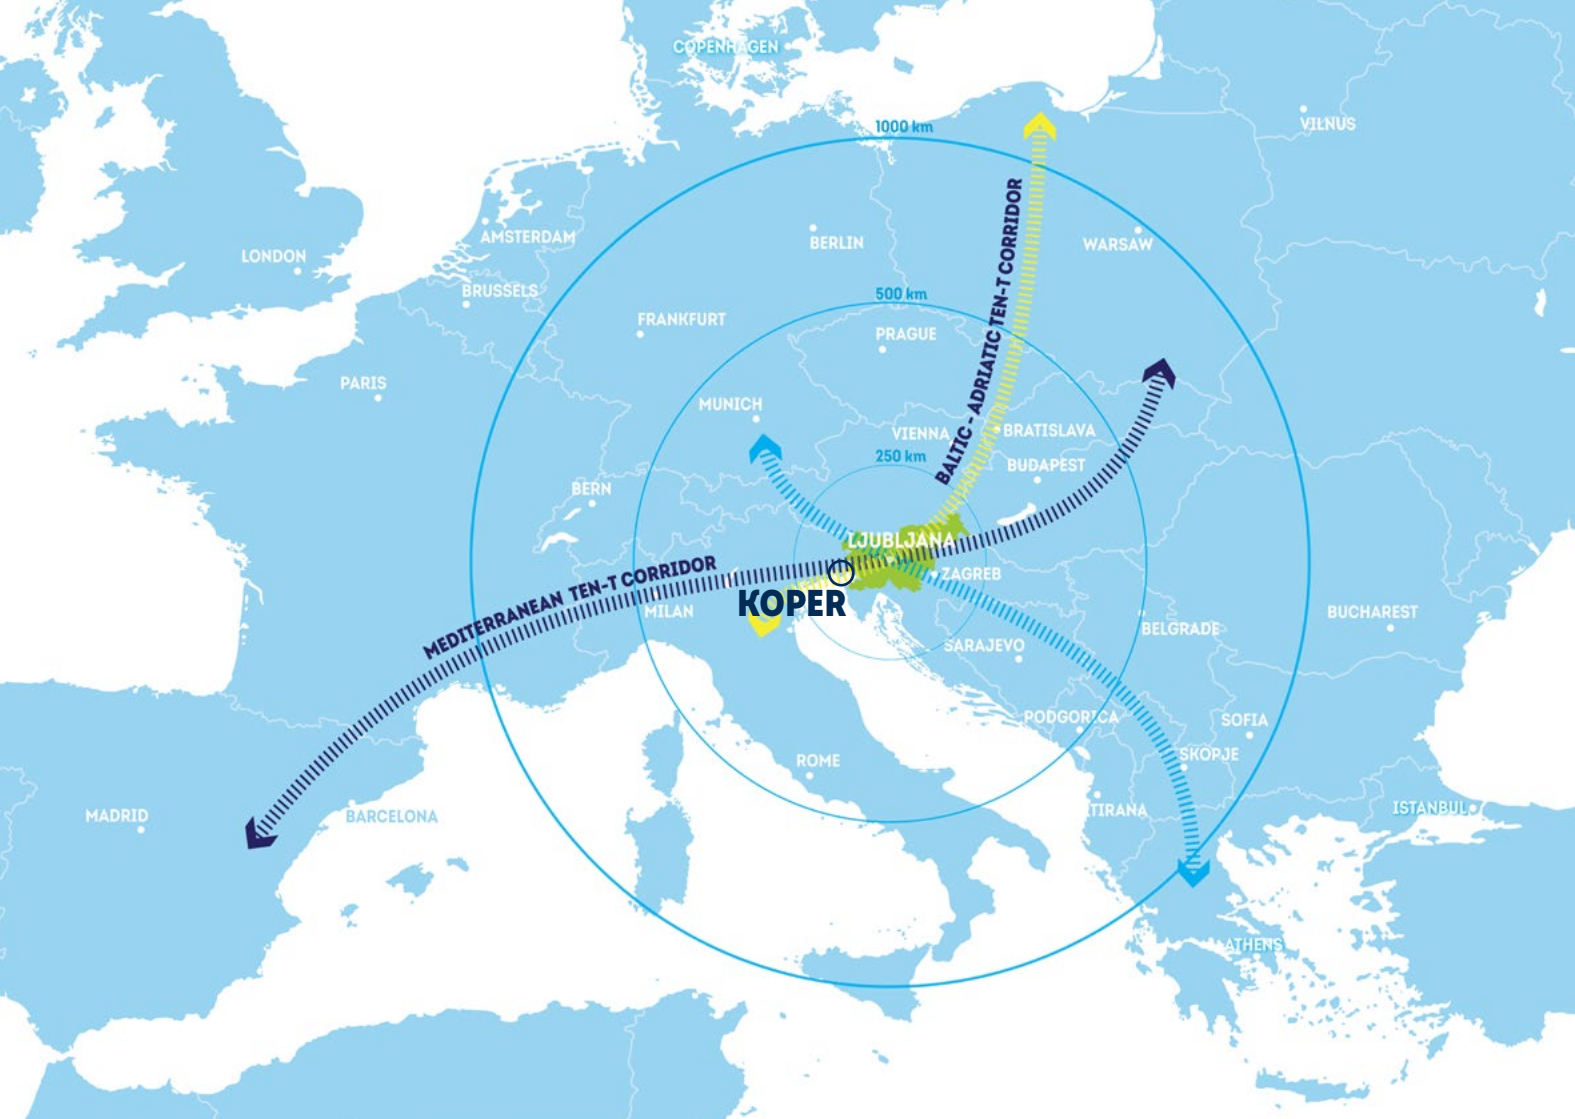

I FEEL
SLOVENIA

GREEN.
CREATIVE.
SMART.

We work Smart.

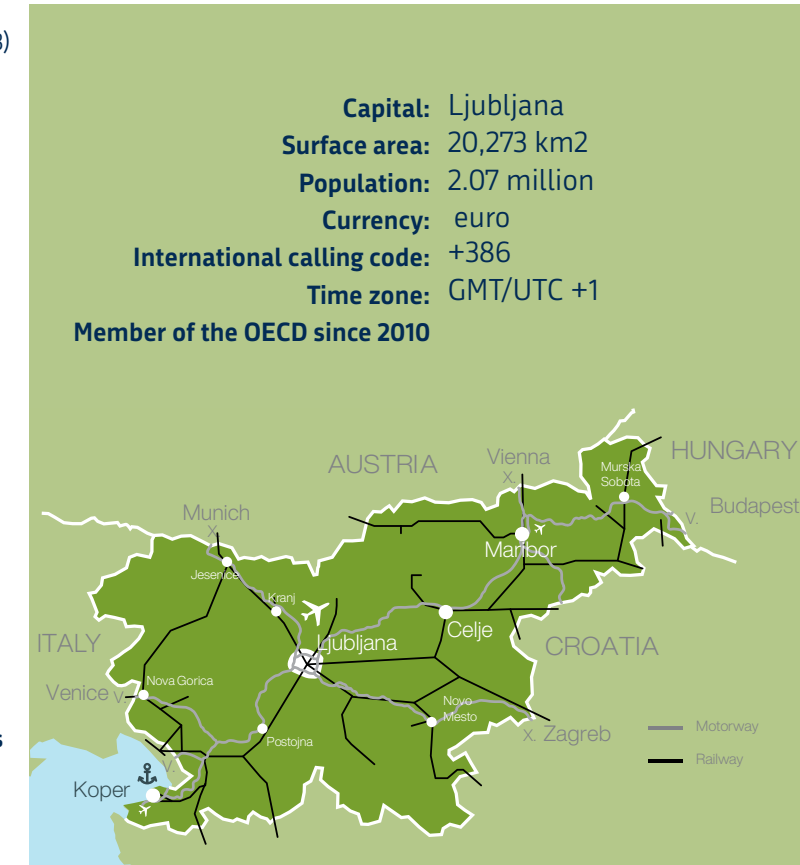

Sustainability starts with a smart supply chain. **The geographical position of Slovenia** offers the shortest and most reliable route to the markets of Central Europe, Eastern Europe, and the Balkans – **the very heart of Europe** – enabling the flow of goods to approximately 300 million consumers.

High-quality logistics services and cost-effective, flexible solutions make **Slovenian transport and logistics companies** excellent business partners.

- **Strong public health system. Life expectancy at birth: 81 years**
(Human Development Index 2019, UN)

SLOVENIA - the Shortest Route from the Far and Middle East to the Centre of Europe

Koper's proximity to the Suez Canal offers a major advantage.

Compared to the ports of the North Sea, the route via Slovenia - the Port of Koper to the major Central European capitals (Munich, Vienna, Prague, Budapest, Bratislava) - is 2,000 nautical miles shorter by sea and 500 km by land.

Rely on professionals.

ABOUT THE COMPANY

Adria Kombi is the largest independent intermodal operator in South-Eastern Europe and offers a wide variety of road-rail transport solutions. Over the past thirty years, the company's clear strategy has enabled it to develop a European train network for transporting containers, trailers, swap bodies, and trucks connecting the main industrial hubs across Europe.

ABOUT THE COMPANY

Luka Koper, port and logistic system, d.d., is a public limited company that develops and manages the Port of Koper, the only Slovenian seaport. The Port of Koper has a strategic geographic position in the North Adriatic region and therefore is ideal for servicing Central European markets. It represents the shortest link from the Far East via the Suez Canal to Europe, with a distance that is about 2,000 nautical miles shorter compared to other Northern European ports, enabling a transit time approximately five days shorter. A consequent advantage is the optimization of the whole supply chain, making it more efficient and leaner, with substantial cost and time savings for customers as well as CO2 savings for the environment.

SERVICES

The company operates all **12 specialized terminals** in the multipurpose port, handling every type of cargo: containers, cars, Ro-Ro, various general cargo products, dry bulk, liquid bulk, and passengers. The total throughput of the port in 2022 was 23.2 million tons, including 1 million TEUs and 800,000 car units, making Koper **the largest container terminal** in the Adriatic and one of **the most important car terminals** in Europe.
