EXPAND YOUR MARKET FOOTPRINT BY PARTNERING WITH SLOVENIAN COMPANIES

Expo 2020 Dubai in UAE is a celebration of knowledge and cooperation, two indestructible guarantors of fair development and the lucrative idea about better future for all. In this respect Slovenia's decision to present itself with its own pavilion, packed with a very rich and attractive program for visitors makes a lot of sense. This world event offers Slovenia an excellent opportunity to prove once again where it belongs: among the most progressive and responsible countries in the world!

High quality of life, dynamic and diverse economy, fast-growing companies, and sustainable growth – these are just a few reasons why choosing Slovenia could be the best decision you have ever made if you are looking for a place to invest, reliable business partners, or just a place to set up your business.

We are very proud that many Slovenian companies are world leaders in certain specific areas in high-tech and niche technologies. Did you know that Slovenia is above the European Union average in terms of use of artificial intelligence, and it has many innovative companies with breakthrough solutions in this field, which place them among the best in the world?

Therefore, it's a genuine honor and privilege to present world known Slovenian companies with top solutions in the field of digitalization and artificial intelligence.

Join us at the Slovenian pavilion and find out, why Slovenia is a land of infinite potential for your business! Networking or simply exchanging views with our companies will be an experience worth your time.

Tomaž Kostanjevec, PhD, CEO

SPIRIT Slovenia Business Development Agency

DIGITALISATION: THE FUTURE OF HEALTHY GROWTH

One thing is very clear about the global economy: those who are not fast, responsive and flexible are left behind. Today, this express train only runs on the tracks of digitalisation. The track is being laid by companies, and the speed of the train is being set by managers. In doing so, we are constantly looking towards new trends that will shape the path of the digital transformation of companies. What will they be like? The 5G network will dominate, blockchain will mature with greater use in industries, cyber security, digital payment services and digital banking will be at the forefront of transforming the financial sector, the transition to cloud services will become even more pronounced, more innovation will be available, as will smart technologies capable of meeting the needs of the population working from home. How are we companies preparing for this?

Slovenia is just the right size for this. It is small, but at the same time agile and flexible. This presents itself as an opportunity for us to develop a specific vision of economic development. We also co-create it with companies, but we remain vigilant: when we pursue digitalisation, rapid and sustainable growth, green technologies and innovation, we do not forget to invest in people.

The assessment and warning from the World Economic Forum is that by 2030 we need to train more than a billion people. The great responsibility of managers who lead tens of thousands of people is to ensure the acquisition of new competencies in completely new areas in the digital transformation. As the President

of the Managers' Association of Slovenia, Medeja Lončar pointed out at the largest Slovenian managerial event, the Manager's Congress, up-skilling brings competencies that enable us to place ourselves where development will take place.

At the same time, we are expanding our digital opportunities to the entire pool of talents: we will be guided in this direction by the Delegation of Women in Management at the EXPO 2020 Dubai exhibition. On December 7, we will invite different opinions on bold and lively digitalisation at a round table in the Slovenian pavilion. This can also become a tool to fill the gaps between men and women in business.

And maybe Slovenia will one day become a popular destination for a technology safari. At the entrance we will be greeted by a sign: People. Planet. Profit. Purpose. Prosperity. A high-speed train fuelled by digitalisation will run through it. This ambition can connect everyone who drives us towards a future of healthy growth.

Petra Juvančič,
Executive Director of the Managers' Association of Slovenia

ICT Association of Slovenia, part of the Chamber of Commerce and Industry of Slovenia, represents the Slovenian ICT Industry. It has a growing number of members including software development and implementation companies, system integrators, global technology suppliers and vendors, telecommunication operators, IT services and consulting companies.

Slovenia has embraced the European Data Strategy that aims to make the EU a leader in a data-driven society. Creating a single market for data will allow data to flow freely within the EU, and across sectors for the benefit of businesses, researchers and public administrations. The value of the single market for data in the EU has been growing from €301 billion (2.4% of EU GDP) in 2018 to an estimated €829 billion (5.8% of EU GDP) in 2025.

The Slovenian ICT Industry is fast-growing, with a high level of digital competencies, export-oriented, and very competitive. It consists of around 3.700 companies and 26.000 employees, contributing 4,5% of Slovenian GDP, with €4,2 billion of total revenue where one third is from export activities. Key state-of-the-art solutions are developed in the areas of Digital Transformation, process automation, government solutions, Smart cities and communities, Industry 4.0 and eHealth. Solutions are based on high expertise in big data, sensing, artificial intelligence and cloud/digital platforms – partnering with end-users to provide new digital products and business models.

The single market for data will be implemented through common European data

spaces, where data from public bodies, businesses and citizens will be available under common and fair rules. The ICT Innovation Network, managed by the ICT Association of Slovenia, has been setting up a Data Spaces Experimentation Sandbox that will dramatically decrease time-to-market for disruptive digital solutions of Slovenian companies. To boost the growth of the European single market for data, the government has supported the setup of Open Data Hub Slovenia, which brings together national stakeholders that have committed to publishing, using and promoting open data initiatives.

The ICT Innovation Network leads the national AI4SI initiative that promotes the introduction of AI into practice, thus filling the gap between research, ICT companies and businesses that can benefit from AI. AI4SI is a founding member of the European AI Forum. Special recognition of Slovenia for its creativity in the field of AI was shown by UNESCO with the establishment of the International Research Centre on Artificial Intelligence in the country.

Slovenia is part of key EU initiatives on data, AI and interoperability, with the goal to become a leading digital nation. The Slovenian ICT sector is actively contributing to shaping the European data strategy through activities in EU-wide initiatives, like Gaia-X, Big Data Value Association, FIWARE and DIGITALEUROPE. Slovenia is an ideal jumping-off point to reaching the wider European market.

Nenad Šutanovac,

Director, ICT Association of Slovenia
Chamber of Commerce and Industry of Slovenia

CORE BUSINESS

Software and business development services and consulting

ABOUT THE COMPANY

Ineor is a world leading international software development company providing global, complete, and advanced software development services and breakthrough key innovative digital solutions for multinational companies, usually the world champions in their field of operation.

Our existing clients love our services and solutions, delivered on time, on budget and with zero bugs. We will make you digital transformation predictable, fast, and tightly cost-controlled.

We incorporate top comprehensive software development and consulting services (process optimization, smart digitalization, risk management, intuitive user experience, smart data management ...) and agile methodologies into each of our projects, delivering the key breakthrough solutions for our customers future.

MAIN ACTIVITIES / PRODUCTS / SERVICES

- SaaS as complete solution: idea, business analysis, development, and implementation.
- Business AI solutions, using AI to improve your business performance and bottom line..
- Developing and integrating systems from on-premise legacy systems to cloud services.
- Consulting and engineering, managing your digital transformation.

CORE BUSINESS

Energetics, electricity, blockchain, P2P market place, renewable sources

ABOUT THE COMPANY

SunContract is an energy-trading platform that utilizes blockchain technology to create a new business model for buying and selling electricity. SunContract platform uses existing grid and optimizes current operations that are costly and inefficient. It connects energy customers in an open peer-to-peer (P2P) marketplace - to create a new type of energy experience - one that puts the customer and our collective future as a society first.

MAIN ACTIVITIES / PRODUCTS / SERVICES

- Direct, P2P energy trading between energy consumers and renewable energy producers
- Marketplace for self-sufficient products: renewable electricity, solar powerplants, electricity car chargers, heatpumps
- Global services

VALUE PROPOSITION / OFFERING

- An open energy-trading platform for renewable energy sources only
- Direct P2P agreements - without a middleman

- Utilizes blockchain technology for buying and selling electricity
- Regardless of where these customers are located
 - Energy services can be pay with Euros or SNC crypto-tokens.
 - No. 1 marketplace for energy consumers who are interested in lowering their electricity costs, and renewable energy producers, who are interested in increasing their profit on surplus production - it offers possibilities to save and earn more.

SEGMENTS

- Electricity providers
- Energetics
- Solar, Hydro, Power Systems Providers

CORE BUSINESS

Cold-chain logistics

ABOUT THE COMPANY

A.N.B. Trade d.o.o. cares about the quality of services at all levels of business. So the whole process of transportation and storage is guided by the requirements of internal and external standards that guarantee the execution of the process in accordance with the requirements. The management of the company is inextricably connected with the policy of sustainable development and respect for technical and environmental standards. So the company operates in accordance with the acquired certificate ISO 9001:2010. In medicine transportation the company cares for validation and regular control of temperature measuring devices. Calibrations of devices and vehicles are done by professional institutions, which issue reports of calibration. Slovenian accreditation is the signing party of the mutual recognition of accreditations agreement and also of the international accreditation organization for laboratories (ILAC) in the area of testing and calibration laboratories.

MAIN ACTIVITIES / PRODUCTS / SERVICES

- Cold-chain transport, storage and logistics
- Storage of documents
- Distribution and selling

CORE BUSINESS

Artificial intelligence and language technologies for writing improvement software.

ABOUT THE COMPANY

The company is engaged in the development of automatic text enhancement services in various languages. The international team consists of top experts in artificial intelligence, language technologies, natural language processing and software development.

MAIN ACTIVITIES / PRODUCTS / SERVICES

The idea of InstaText is to help us write like a native speaker. InstaText is a user-friendly writing and editing tool that helps you rewrite your text so that you are understood and perceived as a professional. InstaText improves style and word choice, corrects grammatical errors and enriches your content to make it more readable and understandable. And all this in just a few seconds.

VALUE PROPOSITION / OFFERING

For non-native speakers who use English in their professional communication, our AI-based online writing and editing tool helps them rewrite and improve their texts. Unlike

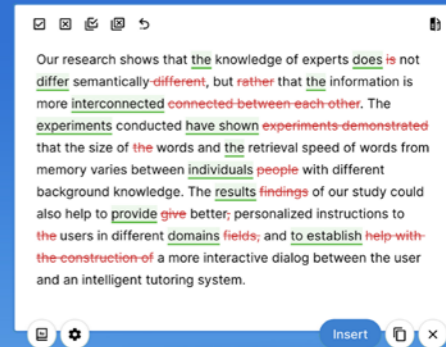

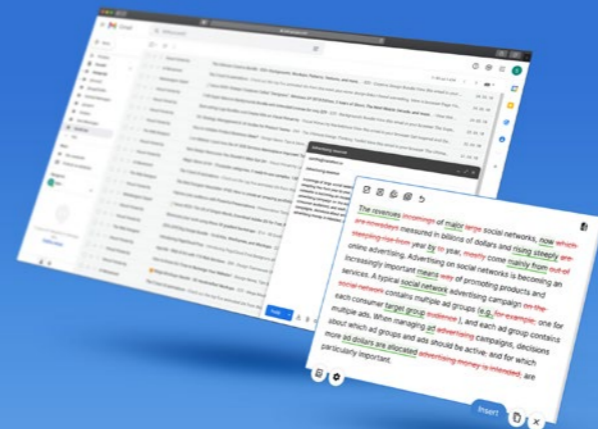

conventional grammar checkers, which mainly correct grammatical errors, InstaText also enriches the content and makes it more readable and understandable.

SEGMENTS

- Research and academia: significantly increase acceptance rates and shorten the time to publication, boost productivity.
- Business and marketing: communicate effectively, write clearly, produce high quality and efficient sentences, be understood.
- Copywriting: boost productivity, improve text interactively and quickly get ideas on how to improve content, increase writing quality and learn how to write better English.

REFERENCES

- Slovenian start-up of the year 2020.

CORE BUSINESS

The main activity of the company is the management of services for AMZS members and others.

ABOUT THE COMPANY

AMZS d.d. is a joint-stock company, initially founded with performing services for members of the national automobile and motorcycle association and other drivers in mind. Today a well-established brand AMZS is recognized as the largest performer of roadside assistance in Slovenia. We are carefully creating a mobility ecosystem and are our members' first choice for safe, carefree, and sustainable mobility. As an integrator of mobility solutions in our 29 centers across Slovenia (including the AMZS Safe Driving Centre, Safe Driving School and the Karting and Motorsport Centre), we amaze our users with state-of-the-art mobility solutions. By connecting various stakeholders, we provide comprehensive solutions in the field of mobility. We always put our users first and because of that we enjoy great trust in all generations. Through our care, we inspire and expand the membership community that is the source of our tradition and the inspiration for our future. Being focused on the mobility of the future, we are always seeking for new opportunities and collaborations.

MAIN ACTIVITIES / PRODUCTS / SERVICES

- Technical inspections
- Car insurance
- Registration related activities

AMZS d.d.

QLECTOR d.o.o.

Rovšnikova ulica 7, 1210 Ljubljana Šentvid, Slovenia

+386 40 644 535

info@qlector.com tomaz.suklje@qlector.com

https://qlector.com

CORE BUSINESS

Software development

ABOUT THE COMPANY

QLECTOR is a start-up company with a young team of experts, created as a joint venture of a spin-out from the Jozef Stefan Institute and the Kolektor Group. Our main product is the state-of-the-art software solution QLECTOR LEAP.

MAIN ACTIVITIES / PRODUCTS / SERVICES

QLECTOR LEAP addresses challenges that manufacturing companies cannot solve with existing approaches. QLECTOR LEAP applies artificial intelligence methods to historical data collected by existing IT systems, such as ERP and MES to automatically construct a digital twin of the shop-floor. During operation, digital twin is used to analyse real-time shop-floor data, to enable the following functionalities: (1) preparation of realistic production plans, (2) monitoring and predicting plan execution, and (3) predicting downtimes and notification of employees.

QLECTOR LEAP simulates and predicts optimal sequences of production schedules in order to be prepared on potential organizational downtimes in advance. It plans and monitors the production based on realistic throughput times,

optimization of inventory turnover, scheduling and adjusting production, optimally scheduling workers based on their limitations and competences. QLECTOR LEAP joins the world of planners and team coordinators in one common digital system and transparently visualizes production plan and stock movement accordingly, which is very useful for logisticians and procurement department.

VALUE PROPOSITION / OFFERING

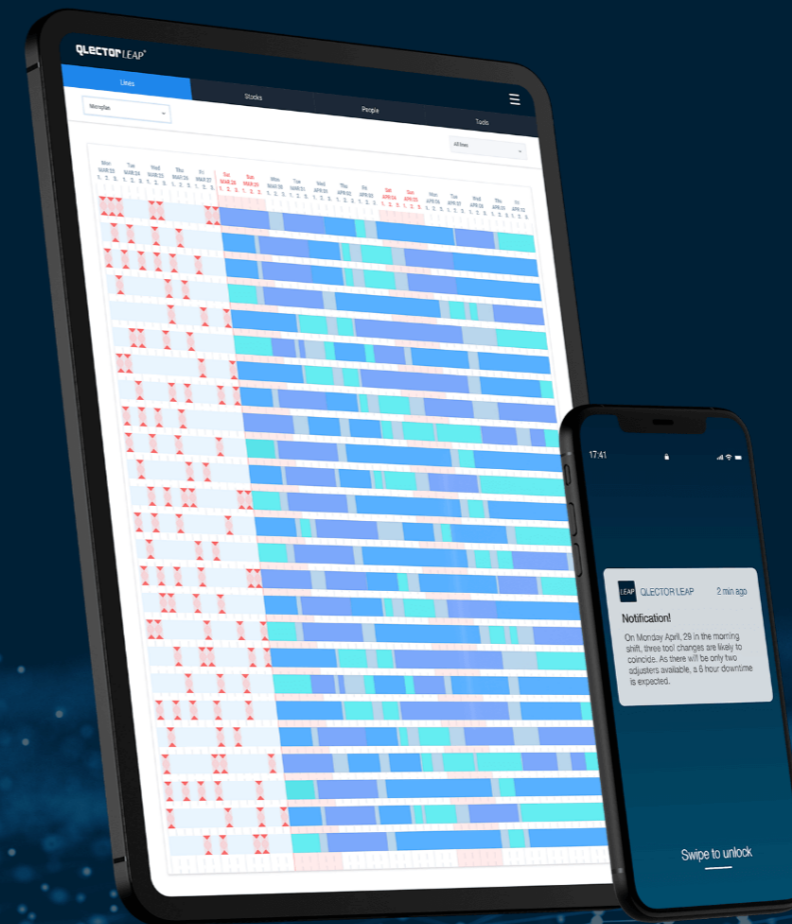

Implementing QLECTOR LEAP saves time for planners and team coordinators by 1 day/week, predicts organizational downtimes for the period of production schedule and reduces them up to 25%, which results with increase of production OEE up to 8%. It also shortens production times on assembly lines by 10%.

SEGMENTS

Our solution fits all industrial areas from repetitive and discrete manufacturing to continuous and batch process industries. We are actively partnering with solution providers in order to establish local presence on foreign markets.

REFERENCES

Trusted by companies from Automotive industry, Home appliances, Railway and Process industry. We are SAP Silver partner, Oracle partner and partnered with T.mobile. We are compliant with ISO 27001 certificate.
